

MEMORANDUM OF CONVERSATION

Conference with Mr. Edmond Brunner, Chief, Industrial Vulnerability Branch (29 July 1953)

1. Mr. Brunner commented favorably upon the usefulness of ORR industry reports in his branch and upon the good working relations which his people have with ORR specialists. Reports in the following fields were mentioned as having been particularly useful: [REDACTED]

25X1B4d

25X1B4d [REDACTED]

2. Mr. Brunner suggested some respects, however, in which ORR reports could be improved from the point of view of the needs of his organization. More analysis of the inputs entering into each production process would be useful. Full documentation showing sources of data and assumptions are helpful to them. He thought that, in many industry studies, a fuller use of United States and European industrial experience would be desirable. [REDACTED]
